To

The Secretary to Government,

Development Department,
Secretariat Fort,
BOMBAY.

No. ADM-7(GEN). Poona-3, dated 12th September 1950.

Subject :- Development of backward areas.
Letter from the President,
Communication Inconveniences
Removal Committee, Shahada,
District West Khandesh ....

.....

Please refer to Government endorsement, Development Department, No. 593/9990-B, dated 27th December 1949, forwarding thereunder a copy of the extracts of items No. 3(iii) and 15 from the above mentioned letter, for my remarks.

2. The question of amelioration of the economic and social conditions of backward classes, including Bhils, was examined by the Adhoc committee appointed by the Government of Bombay in 1942. That Committee recommended the following industries for introduction amongst backward class people including Bhils of West Khandesh district :

1. Cane and Bamboo work.
2. Carpentary and wood turning.
3. Fibre work.
4. Tailering.
5. Catechu making, etc.

As per the recommendations of the ad hoc committee, Government sanctioned the organisation of 3 peripatetic training Schools, one in cane and bamboo work, another in wood turning and lacquerwork and the third in fibre work for West Khandesh District. Government also sanctioned industrial bias Schools for backward class persons in primary schools in West Khandesh district for imparting training in elementary tailoring, rope making, and carpentry and wood turning. These classes are under the control of the Joint Director of Technical Education.

3. The training institutions under the control of this Department in West Khandesh district have so far trained 119 backward class persons including Bhile and they are being organised into co-operative societies. The financial assistance so far extended to backward class trained artisans in West Khandesh district amounts to Rs. 1,602/- by way of loan and Rs. 1,052 /- by way of subsidy. The Industrial co-operative Societies of backward class persons have also been given loans amounting to Rs. 21,800/- and subisdy amounting to Rs. 3,800/- in the district.

4. Under the scheme for award of technical scholarships to backward class students, 8 scholarships of Rs. 20/- P.M. are awarded to backward class students taking training in carpantry and smithy and mechanical apprentice courses at the King Edward VII Technical School, Dhulia. So far 21 students have taken advantage of this facility.

5. This would show that considerable work is being done for development of cottage industries amongst the Bhils and other backward class persons in West Khandesh.

6. The Deputy Registrar , Co-operative Societies N.C.R., Nasik, who was requested to offer suggestions in this behalf reports that the following cottage industries can be promoted amongst the Bhils in Satpura :-

1. Oil Pressing.
2. Capentry and Smithy.
3. Extraction of rosha oil.
4. Bee-keeping.
5. Collection of medicinal herbs, etc.

He also reports that there is scope for organisation of forest labourers' societies in the District.

7. Oil pressing industry has already been selected as one of the industries for intensive development in West Khandesh district. A scheme was also submitted by this office and the same has been sanctioned by Government (Please vide Government. letter Revenue Department, No. 1474/39, dated 2nd June 1948) Under this scheme 10 ghanies are to be supplied to multi- purpose societies which set up ghanies ~~[illegible]~~ two societies have already been supplied with ghanies and the rest have not still taken delivery. The Multi-purpose societies, can perhaps make arrangements for training of Bhils in oil pressing.

8. The village Industries Committee has been promoting oil pressing industry on self- sufficientay basis. It has selected this industry for the aborigina tribes in Dangs. It should request that the committee may be requested to draw up a scheme for

promotion and development of oil pressing industry in West Khandesh district. The district has some social service organisations like West Khandesh Bhil seva Mandal, Bhil Sudhar Samiti and Maharashtra Provincial Harijan Sevak Sangh. The Village Industries Committee may draw up schemes for promotion of oil pressing, bee-keeping, hand spinning and hand weaving and carpentary and smithy in consultation with the local social service organisations. I am of opinion that the Satpura and Bhil areas in West Khandesh may be entrusted to the Village Industrias Committee for allround development as in the case of the Dangs and the Village Industries Committee may be requested to draw up schemes for development of some of the industries referred to above.

9. As far the rosha oil industry, the scope for the development of the industry depends mainly on the available plantations. The District Officer for Industrial co-operatives and ~~plantation~~ Village industries, Dhulia, has reported that there is wild growth of rosha plants in the forest areas of the District and if the coupes are given to societies at upset price, it would be possible to develop the industry. The Bombay Economic and Industrial Survey Committee has also suggested that there are possibilities of extraction of oil from Brahmi, Mallangani and rosha grass. The Director of Industries has already designed a simple plant for distillation of rosha oil and Shri. Patel of Bombay has also designed one rosha oil and distillation plant and he has been requested to give its demonstration before the Village Industries Experimental Workshop Sub-Committee. The plant, when it is finalised, can be made available to multi-purpose societies or forest labourers societies, which undertake

to promote this industry. I should, however, suggest that efforts may be made to increase the plantation of Rosha grass through the Forest Department and the Department of Agriculture.

10. The Bhil Seva Mandal in the district has taken steps to form a forest labourers' society and one coupe has already been allotted to the Mandal pending the registration of the society. As more Societies are started, they might also undertake the work of exploiting minor forest produce such as Ghat bor fruits, tarwad bark, etc. Again, it is reported that there are many Khair trees in the forest areas of the district. It may therefore, be possible to promote catechu industry through forest labourers' co-operative societies when these societies are started.

11. West Khandesh district has a total population of a little over 9 lakhs and nearly 50 per cent of this population consists of aboriginal and hill tribes and other backward class persons. The ameliorative work in this district would largely depend upon the existence and activities of social service organisations. I have at present no idea about the activities of the social service organisations functioning in the areas when, However, I visit the district, I shall contact these organisations and see that they work in combination with the Village Industries Committee for the development of different cottage industries mentioned above.

12. I may add that manufacture of paper from bamboos on cottage scale is not a remunerative proposition in the absence of suitable machinery for manufacture of pulp. The industry of paper making cannot be encouraged in the area at this stage.

13. The question of manufacture of match boxes on cottage scale is being examined by this office separately. But I consider that this ~~xxxx~~ industry may not be suitable for bakeward class persons in the area.

Dev. Department.
'B'

Submitted with reference to this Department letter, No. M.N. L. 1250-B, dated the 10th October 1950 and the underlying proceedings.

2. The Jt. Registrar for I.C.&V.I. has forwarded him remarks with reference to extract paras 3(iii) and 15 from the letter from the president of the Communications Inconvenience Removal Committee from which it will be seen that considerable work is being done for development of cottage industries amongst Bhils and other backward class people in West Khandesh. The Deputy Registrar, co-operateve societies N.C.R., Nasik has suggested certain cottage Industries which can be promoted amongst the Bhils in Satpura. As, however, these cottage industries from the part of village ind.. Committee's schemes to the Satpura and Bhil areas in West Khandesh in Consultation with the local Social service organisations. The Registrar, co-operative societies has, however, stated that Government has already sanctioned the implementation of the Sarvodya schemes in the West Khandesh Distt. in a compact block of 45 villages served about Khandbara, which are mainly inhabited by Bhils. (vide G.R.,,R.D.,, No. 1848/49, dated the 4th July 1949 and D.D. No. 126 of 26th June 1950). As the scheme envisages an all round and intensive development of the area viz. social economic and as it also contains the improve-

ment of communications in the Sarvodya area, it does not seem necessary to take any specific action on the contract paras 3(iii) and 15- These would however seem to be no objection to ask the V.I.C. to enter the scope of its schemes to these areas. as suggested by the Jt. Registrar in para 8 of his letter dated the 12th September 1950. We may also agree with the views of the Jt- Registrar in paras 9 and 10 the A.& F.D. may be requested u.o. to offer its reamrks on the suggestions made by the Jt. Registrar in the first inst., X Papers 12 & 13 of his letter As regards

3. As regards extract para 3 (iii), this Department has not received any further report from the Director of Industries since his endst. dated the 2nd March 1950, In the absence of the Director's report it is not known whether the president of the Committee in question has furnished the necessary details to the District of Ind. and the Geological survey of India and what action has since been taken in that connection. He may, therefore, be expedited in the matter. The draft letter put up may first issue. After issue, the A.& F.D. may see u.o. as proposed above.

Below letter No. ADM-7 Gen, dated the 12th September 1950 from the Joint Registrar, Industrial Co-operatives and Village Industries, Poona, addressed to Government in Development Department, regarding development of satpura and Bhil area of West Khandesh District.

. .....

No. ADM- 713,
Poona, the 26th October 1950.

Forwarded with compliments to the Secretary to Government, Development Department, Bombay.

As regards the development of the Bhil area of West Khandesh District. I should state that Government has sanctioned the implementation of the Sarvodya schemes in the West Khandesh District in a compact block of 45 villages round about Khandbara which are mainly inhabited by Bhils. The Schemes is being implemented since July 1949. It envisages an all-round and an intensive development of the area social, educational and economic. Rs. 1,02,701 for the year 1949-50 and Rs. 61,180 for 1950-51 have been sanctioned by Government for implementing this scheme. Among other things the scheme contains the item of "Improvement of Communications" in the Sarvodaya area."

Sd/. .....

Registrar of Co-operative Societies,
Bombay State, Poona.

2. The papers may be referred ue. to the Electrical Engineer to Government for favour of very early remarks on the representation.

Id/- 25-8-50 Id/- 25-8-50

Very urgent.

u.e. to E.E.-cr. Cngr. to Government dt. 26-8-50

dated 26-8-50

Id/-

Below U.O.R. No. S. 59/65/67512 dated the 26th August 1950, from Government in the Public Works Department.

No. C. 125/ 8682 of 1950.

Bombay, 5th October 1950.

Returned, with compliments.

2. The applicant has been contacted and it is ascertained that three of his distilleries are closed down owing to Government's prohibition policy, and the applicant has therefore applied for a 10 h.p. load to start a flour mill to earn his livelihood. From the enquiries made with the supply Company, it is learnt that the company is not in a position to accommodate any more load, as there are 36 applications for such type of load already pending with the Company, including one or two applications in the same locality where the applicant has suffered owing to Government desired to start his flour mill.

3. As the applicant has suffered owing to Government's prohibition policy, it is suggested that the applicant may be asked to obtain a priority certificate from the District Magistrate, on the Strength of which the supply Company should given preference to the applicant over other applicants whose applications are pending with the company, and should comply with the

requisition, as the Company can safely take some more load on the station.

Id/-

Electrical Engineer to Government,

Id/-

1932/36/ 81826.

E. Br (I). P. W. D.

Submitted with reference to the H.M. P.W.D., orders on p- 3 ante.

2. Shri. H.P. Patel, Ex-e Distillery Contractor, Palanpur requests for supply of a load of 10 H.P. to start a flour-mill at Palanpur. He adds that as he has lost his business due to Prohibition Scheme his request may be considered sympathetically.

3. The report submitted by the Electrical Engineer in the matter will be found on p-5 ante. It will be seen therefore that the supply coy is not in a position to take up this load as there are already several applications for motive power pending with it. The Electrical Engineer, however, reports that the coy can safely take some more load on the station. That officer therefore suggests that since the applicant has suffered owing to Government prohibition scheme, the applicant may be asked to obtain priority certificate from the D.M. and on the strength of that certificate the supply coy. may be directed to give preference to the applicant over other applicants whose applications are pending with the coy.

4. Supply of energy by the Palanpur license is not controlled by Government under the provisions of the Bombay Electricity special powers Act, 1946, the

S

The supply ccy has therefore to deal with applications in accordance with the provisions of clause VI of the schedule to the I.E.Act 1910, under which the ccy cannot normally give preferential treatment to any applicant. In this connection it may be mentioned that recently we have issued instuctions to the licensees, which are not controlled, that other things being equal preference may be given to the requisition for supply from displaced persons, on the strength of essentiality certificates from the D.M. concerned; vide G.L. No. 1932/36-E(II), dated the 1-4-1950. No such orders have so for been issued in respect of the persons affected by the Prohibition scheme. It is therefore for consideration whether licenses may be directed to give similar concessions to the persons affected by Government prohibition scheme on the strength of priority certificates from the D.Ms. concerned and the case of Shri. Patel may be dealt with accordingly.

No. 1932/36-El.(I).

Public Works Department,
Bombay Castle, (Bombay. No. 1),
20th December 1950.

From

The Deputy Secretary to the Government of Bombay,
Public Works Department.

To

All the Licensees and Sanction Holders which are not controlled under the provisions of the Bombay Electricity (Special Powers) Act, 1946.

Subject:- Control over the supply of Electricity.

.....

Dear Sirs,

I am directed to state that since Government has decided to help the persons affected by the Government Prohibition scheme, as far as the requisitions for electric supply are concerned, the following procedure is prescribed for the general guidance and observance of the licensees :-

Other things being equal preference may be given to persons affected by the Government Prohibition Scheme on the strength of a priority certificate from the District Magistrate concerned,

2. The District Magistrates are being requested to issue certificates to benafide persons and on receipt of such certificates you are requested to give prierities in respect of connecting their loads.

Yours faithfully,
